How to Use Your Kitchen Pail

Simple steps to help you get food waste in its place

Set up your kitchen pail in a convenient location – near where you prepare food works great.

Line your kitchen pail with a clear plastic, paper, or compostable bag.

Collect all food scraps and food soiled paper products.

Check the label on the front of the pail to make sure that organic waste is collected properly.

Remove bagged organics from your kitchen pail when it becomes full and add the bag to your green organics bin.

Place your green bin at the curb on your weekly service day, 3 feet from other bins and any obstacles.
