Ms. Gates,

Thank you for writing and for your comments. The advisory committee of two dozen people has been meeting for several months and put a great deal of effort and time into considering options. They are heading toward a presentation of options/recommendations later this year.

It would be helpful if you provided some detail with regard to what you like or dislike about the potential uses of the Corp Yard property. The most helpful thing is identifying what you'd use it for (other than storing Garbage trucks).

That parcel will be vitally important to the success of an invigorated River District and we are trying to gather as much feedback as possible. The committee is trying to strike a tricky balance between improving the natural setting in that area and providing useful amenities to our residents in Folsom and visitors from outside Folsom.

Best Regards,

Mike Kozlowski  
Mayor

Council Members,

I recently saw the two Citizen's Advisory Committee's refined options on the City of Folsom Corporation Yard. I have concerns with what is being proposed. First and foremost, I feel this process is being rushed and not given the thought and respect it deserves. This is a beautiful city that people strive to go to for the nature, trails, and waterways.

The City of Folsom and Citizen's Advisory Committee should be looking for more long term options that are ideal for the community, the city, nature, and the history of the area. We should be focusing on preserving and not making a quick buck. Keep the area beautiful and respect the nature. I believe open space is the most precious and rare commodity a city can offer. Commercialization ruins cities. Not many cities have what we have. Please don't ruin District 1.

Thank you,

Nicole Gates
