EXCAVATION SPOILS DISPOSAL FORM

Folsom Municipal Code § 14.28.050(G)(313.3) requires all custom home builders and pool contractors to notify the City, in writing, of excess home construction and/or swimming pool spoils dumpsite locations.

In the past, open ditches or vacant parcels have been inappropriately used as a local dumpsite for excess spoils. To discourage this illegal dumping practice, the City will require the contractor to provide a confirmation letter from the property owner receiving the spoils.

DISPOSAL SITE REQUIREMENTS:

- Within the City of Folsom - for fill exceeding 50 cubic yards (FMC § 14.29.202)
 - a confirmation letter from the property owner receiving the spoils; AND
 - a valid grading permit for the site receiving the fill
- Outside the City of Folsom
 - a confirmation letter from the property owner receiving the spoils; AND
 - additional documentation may be required to demonstrate compliance with the law in the jurisdiction in which the disposal site is located (e.g. grading permit, asbestos testing, etc.)
- Commercial landfills
 - an original, dated load ticket from the site, regardless of site location. This Ticket will be submitted via email to ENGINEERINGEPC@folsom.ca.us. Without this ticket the related permits will not be finalized.

A stop-work notice for the work will be issued if this documentation is unavailable at the time of the foundation or pre-gunite inspection. The contractor may reschedule the inspection once the missing documentation is present at the job site. **A \$150 re-inspection fee will be assessed and paid in full** prior to scheduling the re-inspection.
