By-District Elections Paper Map Drawing Kit

Population Based Census Areas

Use this map to outline the five districts you feel would best represent each area's population. The number in each outlined area indicates the total population of that "population unit." Each district must be as close as possible to the same population, with no more than a 1,500-person difference between the largest and smallest districts. If perfectly divided, each district in Folsom would have 15,008 people.
