

## 01/05/22 C. Gorton Comments on Demographer Maps

Attached are three proposed maps created by the City's demographer. On each map, there are three areas outlined in pen. These outlined areas are part of our neighborhood. Many of the families know each other and are good friends. Our kids have grown up together, attended the same schools, worked together to maintain our trails, and created a united front to keep our wetlands intact against development. If you divide these outlined areas, you will be separating a community, creating unnecessary collateral damage that can never be fixed.
